CVMG Cell Phone Policy

We have asked the patients not to use cell phones in our clinic. You know the reasons: people on cell phones bother other patients with loud and boisterous talking, the ringers are noisy and annoying, patients are loathe to interrupt a call to take care of necessary business we need for them to do for us, when the doctor walks in the room they want to take another 2 minutes of his time to let them finish up their phone call, etc.

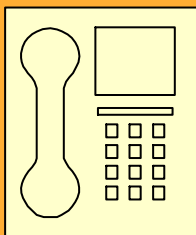

We have not, as yet, instituted a cell phone policy for employees. However, we notice some of the same problems taking place with our employees and their cell phones as happens with our patients. We have seen nurses talking on their phones while dealing with patients, front desk staff talking on their phones while taking care of patients. Some of the cell phones in the clinic ring all day long. It is not uncommon for some people to receive 10 or more calls a day on their phones. While we appreciate not clogging our business lines with personal calls, it seems excessive to have that many personal calls a day at a person's workplace. I think it is a great service for working mothers to have their children's care takers be able to reach them with emergent issues. It is also nice to have the automobile repairman be able to reach you about important decisions you have to make. However, having friends call just to chat is not acceptable when this causes constant interruptions during the day. An occasional personal call during a person's break time is perfectly all right. However, the call should be handled in a private area away from patient care areas.

Our policy at the clinic will be:

- Cell phones are permitted.
- Phones may not be used around patients. Incoming calls should be taken after the patient care is finished.
- Loud and noisy ringers and message reminders should be disabled if phones are left in working areas.
- If phones are carried on your person, you should select vibrate if you wish to leave your phone active.
- Employees should consider turning off phones and then checking for messages at appropriate times.
- Emergency messages are all right, of course, and may be handled ASAP.

Personal, non urgent calls should be handled on scheduled breaks and away from patient care areas.

You may want to inform your friends of your business hours and ask them not to call you during this time for non-urgent matters. If an employee has a pattern of making an inordinate number of personal phone calls during the day that interferes with his or her work production, that employee will not be permitted to use a cell phone while at work.

Colleen Wilson

Colleen Wilson works in the Spanish Fork Clinic. She has been there for 20 years and really enjoys her job. She is the records secretary and is also the office's HIPAA specialist. Colleen has spent most of her life in the medical field as a secretary with her first job as a clerk in the "Old" Payson City Hospital.

Colleen was born and reared in Payson. She graduated from Payson High School and went to Snow College on a Music Scholarship. She also went to LDS Business College in Salt Lake City.

After getting married, Colleen and her husband moved 9 different times, lived in 2 states and 5 cities before returning back to her roots of Payson. She says she needs to move again to clean out all the junk that has accumulated over the past years.

Colleen and her husband have 2 children and 6 grandchildren. Her husband retired a few years ago after working for the Utah Highway Patrol for 32 years. He now does all the landscaping at the Peteetneet Park in Payson. Colleen enjoys helping him plant the flowers each spring.

Colleen's hobbies are all musically oriented. She is a tremendously proficient flute player and enjoys playing music at weddings. She is a member of the Payson City Band and plays at the Summer Sunday Band Concerts (which her brother directs) and also for the Payson Civic Chorale. Colleen sponsors the Huff Music Contest with her other family members at Payson High School.

Colleen enjoys working so closely with many of you in CVMG.

CVMG is transferring our 401(k) monies to Transamerica. You have probably already heard about this move, BUT IT IS IMPORTANT YOU ATTEND THE INITIAL MEETING. One has already been held at SFC. The last meeting to be held will be at Art City Medical Center on July 28th at 8:00 a.m.

Name Badges

Please remember to always wear your Name Badge. This is an extremely important

part of the uniform and is expected to be visible on every employee.

Dr. Carter S. Lytle

Dr. Lytle works out of the Spanish Fork Clinic. He has been with Canyon View for the past 12 years.

He was born in Powell, Wyoming, but lived in Montana until he was four. His family then moved to Salt Lake City where he graduated from East High School. Dr. Lytle is an Eagle Scout and served his church in Billings, Montana, where he lived until he was four years old.

Dr. Lytle did his medical school at Medical College of Wisconsin in Milwaukee and graduated in 1994. He then did an internship at William Beaumont Hospital in Michigan and his residency at the Kansas University Medical Center.

Dr. Lytle is married to Tami, who

is a personal trainer and works out of their home gym. The Lytle's have four children. Tiffani was Miss Salem in 2006 and is now married. Parker, who did some work for CVMG during his high school years, is also married and now works in Provo and goes to UVU. Summer and Brooke live at home keeping Mom and Dad busy with all their school and outside activities.

Dr. Lytle enjoys basketball, weightlifting, the outdoors where hunting, shooting, and camping are favorite past times. He also enjoys wood carving, exercising and spending time with his family. One of his most favorite things to do is go on cruises. He has been to most of the Caribbean Islands, Hawaii, and Mexico.

Dr. Lytle currently is serving as Chair for the Family Practice De-

partment of Mt. View Hospital and also as the chairman of the Quality Committee for the Utah Valley Physicians Network.

Thank you Dr. Lytle for your service to all!

CV Womens Care to Move

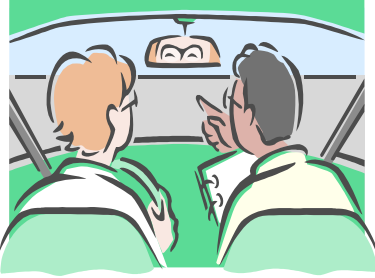

Canyon View Medical Group will be renting space in the MVH's Medical Office Building. They will be moving next door to our Payson Pediatrics office. Over the next few months remodeling will

occur and then in October or November the OB/GYN's will move from their current location to the new site.

Mountain View Hospital's Medical Office Building

The Wife

A woman accompanied her husband to the doctor's office.

After his checkup, the doctor called the wife into his office alone. He said, "Your husband is suffering from a very severe stress disorder. If you don't follow my instructions carefully, your husband will surely die.

"Each morning, fix him a healthy breakfast. Be pleasant at all times. For lunch make him a nutritious meal. For dinner prepare an especially nice meal for him.

"Don't burden him with chores. Don't discuss your problems with him; it will only make his stress worse. Do not nag him. Most importantly, make love to him regularly.

"If you can do this for the next 10 months to a year, I think your husband will regain his health completely."

On the way home, the husband asked his wife, "What did the doctor say?"

"He said you're going to die," she replied.

Always remember:

If Mama ain't

HAPPY, then no-

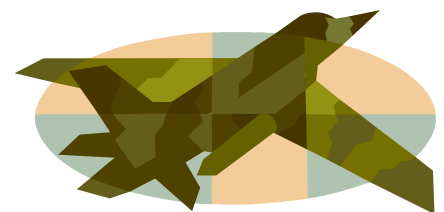

body's HAPPY!

Dr. LeSueur Returns to Military Service

Dr. LeSueur worked his last day for Canyon View Medical Group on Thursday, July 8th.

After waiting several months he finally received his orders to report to North Carolina where he'll be working on Seymour-Johnson Air Force base. He reports to the Air Force on July 19th and will be in North Carolina for at least the next four years.

We will surely miss him and wish him great success and happiness in his new assignment .
